Since 2015, Christian faculty from several HK institutions have organized the annual Logos International Forum (LIF) to promote faith-learning integration with the vision to engage society and culture. Typically, we have parallel tracks for those in different disciplines to have in-depth discussions.

As in the last few years, LIF 2019 will take place on the first Saturday of May, which happens to be the centenary of the May 4th Movement. It was the historic awakening that the young Republic must find her place in the world. China is a superpower today. But there are many needs.

LIF2019 will explore how Christians could contribute to the development of Chinese society and culture in Business, Science, Social Sciences and the Humanities.

4-track conference for Christian academics & practitioners in different fields
